Technology Road Map for Hedge Funds

What is TechMap 2020?

TechMap 2020 is a technology road map that helps hedge funds and asset managers understand their current and future technology needs in light of their business goals in a changing economic and regulatory environment.

What does it give me?

- Perspectives on the challenges of technology, and actionable ideas about its role in your company.
- Articulated plans and visions for the future.
- Understanding of how to best extract business value from technology.
- The ability gauge technology's performance.
- Technology's explicit contribution to meeting core business objectives.
- Implicit value of the technology portfolio, along with your vision for the year ahead.
- A look at the immediate business requirements and a plan for the long-term growth and evolution of the business.
- Build versus buy decision points.
- Core architecture requirements.

This 5 Step process delivers a concise and consolidated view of your firm's current and future technology requirements, along with a list of commercially available solutions and a discussion of unique needs that may require custom solutions.
